

Prepared to Recover vs. Hoping for the Best

When downtime hits two businesses,
the difference isn't what broke;
it's how fast they can get back to work.

No recovery plan

Work comes to a stop

Files are missing

Team waits

Customers feel the delay

The day falls apart

Recovery planned

Work resumes quickly

Files are restored

Team stays productive

Customers aren't affected

The day stays on track

Some businesses lose a day. Others barely miss a beat.

Which business will you be?
